

Business and Environmental Relations

Green Mountain Energy Company maintains participation in a variety of local and national environmental and renewable energy organizations. This keeps us on the cutting edge of emerging issues and helps us “raise the bar” in our own corporate practices.

BeGreen Business Partners

Chicago Climate Exchange (CCX) – CCX is a self-regulatory exchange that administers the world's first multi-national and multi-sector marketplace for reducing and trading greenhouse gas emissions.

American Forests – American Forests works to protect, restore and enhance the natural capital of trees and forests. Healthy forests filter water, remove air pollution, sequester carbon, and provide homes for wildlife. Green Mountain has partnered with American Forests to offer eMission Solutions products that offset carbon emissions through reforestation and other tree planting projects.
